Dokumen Fitur Tersinkron

API | CMS | Mobile | Landing

Tanggal: 2026-09-24 | Git: c3ab099

Sumber kebenaran: apps/api/ENDPOINTS.md

1. Ringkasan Verifikasi Sinkronisasi (2026-09-24)

API NestJS: tsc bersih + e2e 28 suite / 282 test hijau (FIREBASE_STUB=true jest --config ./test/jest-e2e.js --runInBand).
Kegagalan sesekali pada full-run adalah flake beforeAll-timeout di bawah load; semua suite hijau saat rerun solo.

CMS Next.js: tsc bersih + next build 12/12 halaman sukses.

Mobile React Native: tsc bersih + jest 11 suite / 103 test hijau.

Landing Next.js: 100% statis (tanpa fetch API by design), next build 4/4 sukses.

Prinsip: hanya angka dari respons server yang ditampilkan. Yang belum ada endpoint-nya disembunyikan dengan TODO jujur, bukan angka palsu.

3. Kontrak Lintas-App (jangan dilanggar)

- Komisi platform: flat 5% dari GMV (dibaca via GET /admin/settings, bukan hardcode).
- Service fee: mengikuti service_fee_enabled/amount server; walk-in tanpa fee.
- Kode booking kasir: format KS-XXXXXX, unik; check-in sekali saja.
- Slot blocked bukan booked: statistik paid tidak tercemar maintenance.
- Pending payment event TIDAK makan slot sampai webhook settlement.
- Saldo payout dihitung live (tanpa tabel saldo yang bisa drift).
- Landing 100% statis: angka ilustrasi TODO-WEB, bukan data produksi.

4. Sisa TODO Jujur

- CMS: halaman voucher (tombol disabled jujur); rute detail dispute (anchor sementara).
- Mobile: UI kasir walk-in/check-in dan blokir slot (klien siap, layar belum).
- Backlog Trello To Do: EL-00..EL-05 (ELO), ST-05..ST-10, REL-01/02, GAP-01/02, OPS-01, UX-01/05.
